## Pregnancy Center

*Offering Hope and a Future*

### Did You Know?

Did you know that sexually transmitted infections (STIs) are the most common diseases in the U.S. after the cold and flu? One in five people in the U.S. have an STI. According to the CDC, there were over 2.4 million STIs reported in the United States in 2023. And there are around 12 million new cases of STIs reported every year - almost 33,000 cases each day - with 63% of these cases occurring in people under 25 years old.

Sadly, many may not even realize they have an STI and may transmit it to a partner. And, when an STI is combined with an abortion, the results can be detrimental, leading to long-term pelvic pain and fertility issues. In fact, pelvic infection is the most common complication of abortion, and the presence of an existing lower genital tract infection increases the risk of complications, according to Heartbeat International.

At Life Care Pregnancy Center, we offer critical educational that covers the dangers of STIs. Through these classes, we aim to equip our clients with the tools they need to make

informed, healthy decisions that align with God's plan for their lives. Additionally, we are partnering with the Health Department to refer clients to receive free STI testing at their facility. Thank you to everyone who supports this vital mission and provides a way for us to walk alongside our clients on this journey.

## What can you do?

*Pray.*

*Share the truth. Educate everyone you meet.*

*Get involved to change the trajectory of our culture.*

*Pray more.*

Financial donations to Life Care may be made securely by clicking the button below!

Yes! I want to celebrate LIFE!

*LCPC + moms + dads + babies = Love and Mercy*
